

RSD EOS Consolidation Services

Migrate your Output Management Solutions using RSD Proven Methodology

Why consider a consolidation project?

For all major organizations, back-office business applications continue to produce a remarkable amount of information that must be properly managed and safely distributed to users. Companies need to harness the full value of their information to remain competitive, keep costs down, and reduce risks associated with information management.

THE CHALLENGE:
the proliferation of output management.

THE GOAL:
the consolidation of look-alike products.

What are the benefits of a migration project?

Consolidation brings multiple benefits for a company and its IT organization;

Cost Reduction: as you reduce the number of different products, companies reduce their maintenance costs and eliminate license renewals of unselected products.

Training Optimization: IT teams can focus on developing expertise with a single software product thus reducing training.

Capitalization on resources: IT department can re-assign IT admins that were dedicated to the administration of multiple products to other duties within the organization.

Based on our migration experiences, **savings from a consolidation project can represent up to 40% of the total budget** dedicated to output management.

How are consolidation projects implemented with RSD?

- **A Dedicated Consolidation team:** RSD's successful track record is a result of our experience and expertise to implement effective enterprise solutions.

- Validation & acceptance
- Admin, User Training

Production:

- Deployment

RSD Successful Consolidations

RSD takes pride in understanding the particularities of each customer's project and in helping build the right migration plan that suits your requirements and needs. RSD has an impeccable track record, having successfully migrated some of the largest worldwide companies in the recent past from the following solutions:

BMC Control-M Output Management	CA Dispatch	Beta 92
ASG-Mobius ViewDirect	CA Deliver	Beta 93
ASG-Mobius Infopac	CA Bundle	CA View

Examples of recent client migrations

RSD migrates a leading Retail Bank in Spain

Migration: From BMC Control-D to RSD EOS

Objective: Consolidate output management tools reducing the software licenses budget.

"The pilot project was a great success for us. EOS has enabled us to confidently move forward with technology from a vendor that has been committed to the IBM mainframe platform for the past 40 years, while at the same time reducing our capital expenditure and operating costs."

General Manager - Information Technology

RSD supports a large Financial Institution in Europe

Migration: From BETA Systems to RSD EOS

Objective: Reduce and consolidate the number of output management products for costs savings.

"RSD's EOS platform was selected thanks to easier product administration, its strong technical support expertise, and better budget control. During the Proof of Concept, RSD was able to leverage its Migration tool for Beta, simplifying migration and shortening the project payback period."

How do you contact the RSD Team?

If you have consolidation plans and would like to migrate your existing output management tool(s), please contact support@rsd.com or your local sales representative.

About RSD
